# Powering you RV or Boat with the most reliable source known to man

*"We live at Blue Mesa reservoir campground, in our RV, 4 months out of the year. Last year Atlasta Solar installed 3 Kyocera 135 watt panels on our RV, we now run everything with the solar power, and have very little use for our generator."*

*We tell everyone we can "How happy we are!"*

## FREEDOM TO GO WHEREVER

- RV Solar systems are designed to match your needs, One 135 watt panel helps to keep your batteries healthy and full for a good weekend trip with 2 people. (We also have smaller or larger options.)
- A second solar panel is added for those who live in the RV full time or have a family along.
- Solar panels that Atlasta installs will withstand summer heat and winter hail, and will continue to produce power day in & day out for many years into the future. (25+ years warranty)
- Solar panels create DC power, just as RV batteries take DC power, this means solar panels with RV's batteries are a perfect match.
- **DON'T BE CAUGHT WITH YOUR GENERATOR ON!**

Charge your batteries while enjoying the peaceful tranquility of a remote campsite!

*Atlasta has been in business for 30+ years providing the best sales, service, and installation*
